## Recipe Notes

This is a raw ale - no boil.

Wort brought to 82 °C and held for 15 minutes to pasteurize prior to cooling.

Beer is traditionally served with low carbonation (residual CO2 from fermentation).

Original recipe at <https://escarpmentlabs.com/blogs/resources/traditional-norwegian-kornol-recipe>

Remove any protein and juniper oil ("head ache") from the wort before the break (what break?).

Changed yeast for availability.
